

Outboard Winterization Program

Basic Winterization:

1. Condition fuel system with stabilizer with ethanol treatment.
2. Seal internal engine components with storage fogging oil.
3. Inspect mechanical condition of outboard and compression test.
4. Lube zircs and prop shaft.
5. Check tire pressure
6. Disconnect batteries if applicable
7. Inspect trailer-bearings, lights

Labor rate plus parts

Carry in model 2.5hp-25hp	\$ 57.50
3-6 cylinder models	\$115.00
EFI models add	\$ 25.00

Stabil marine fuel treatment prevents water in fuel	\$ 11.99
Storage fogging oil coats internal engine components to Prevent rust in cylinders.	\$ 7.49
Anti-freeze -100 for livewell and bilge pumps	\$ 12.99

Optional Winterization Services:

Livewell and bilge pumps labor	\$ 39.99
T9 Boesheid corrosion guard stops saltwater corrosion	\$ 17.79
Gearlube recommended during winterization to insure no water is in lower unit which may freeze and crack lower unit over the winter. \$.50 per oz. plus ½ hour labor	\$ 57.50
